

Fitness Mat

Floors in fitness rooms have the most different demands. They should be sustainable, but also absorb shocks and sound. An elegant look is, of course, a must. Van Dyck's recyclable, environmentally friendly fitness floors are true sound absorption masters and are specially developed for the professional market. From a beautiful floor in the dumbbell area, up to optimum noise reduction in your fitness space. Van Dyck has a wide range of products that excel in wear and tear, shock and sound-absorbing properties.

"Powering the future with **sustainable solutions**"
